HAYANA, August 8.—The political situation in Cuba is becoming more critisituation in Cuba is becoming more critical with each passing day. The most conservative persons in Havana unhesificatingly say that serious trouble is brewing and that it may break out any day. The Spanish business element in Cuba, especially the old Spanish merchants who know the Cuban character because of their long experience here, predict trouble. Some are disposed to rejolee, for they have never had any faith in the ability of the Cubans to govern themselves, and they believe that with the first sign of serious trouble, the United States will return to the island, and in the future Cuban commerical interest will be safely guarded.

When Jose Miguel Comez, presidential candiate, who was named in opposition to Estrada Palma, openly said that he did not propose to obey the mandates of the Supreme Court, every one realized that the situation was grave.

this financial operation Japan might have a very considerable portion of her claim for the "expenses of the war" liquidated. The railroad is ostensibly the property of the Russo-Chinese Bank, although built by government money advanced through the bank, and since its completion operated, managed and policed by the Russian government.

Japan chinoit tanks as shoes regarding the railroad would be, militarily, to control the destines of the three provinces of Manchuria, which she has promised to return to China.

But Japan is entitled to zeimbursement for the expense to which she has been put in restoring the railroad below the present position of Linevitch's army, rebuilding the bridges and narrowing the gauge. If China could not find the money, some other power or powers might do so, and the road would become hypothecated to the powers which advanced the money.

It was M.
